Comment: Sample (A) **Comply** with the UPF 40+ labelling requirement

Labeling requirement :

According to EN 13758-2:2003+A1:2006, in order to fulfill the UPF 40+ labelling requirement, the clothing assembly shall have the lowest UPF value larger than 40 and average UV-A transmission smaller than 5%.

Remarks :

1. The results given apply only to the colour and weight of fabric tested. Unless otherwise stated the fabric is tested dry and relaxed.
2. This UPF Rating is for the fabric and does not address the amount of protection which is afforded by the design of the article. The manipulations involved in garment manufacture such as stretching and sewing may lower the UPF of the material.
3. The protection offered by this fabric may be lessened :
 - i. At points where the fabric is in close contact with the skin such as across the shoulders
 - ii. If the fabric is stretched
 - iii. If the fabric is wet; and
 - iv. With time due to effects of normal wear.
4. For headwear: The item does not provide protection against reflected or scattered solar UVR.
